控制器 Controller

菲克科技专注于精密运动控制领域，提供高性能控制器以适配我们自主研发的步进、伺服、直线位移产品。从点到点的简单位移到任意曲线的多轴协调运动以及和其他仪器进行交互程序控制，我们的控制器能很好的适用于各类应用场景。同时，针对您的特殊控制需求我们能提供从硬件到软件的深度定制服务。

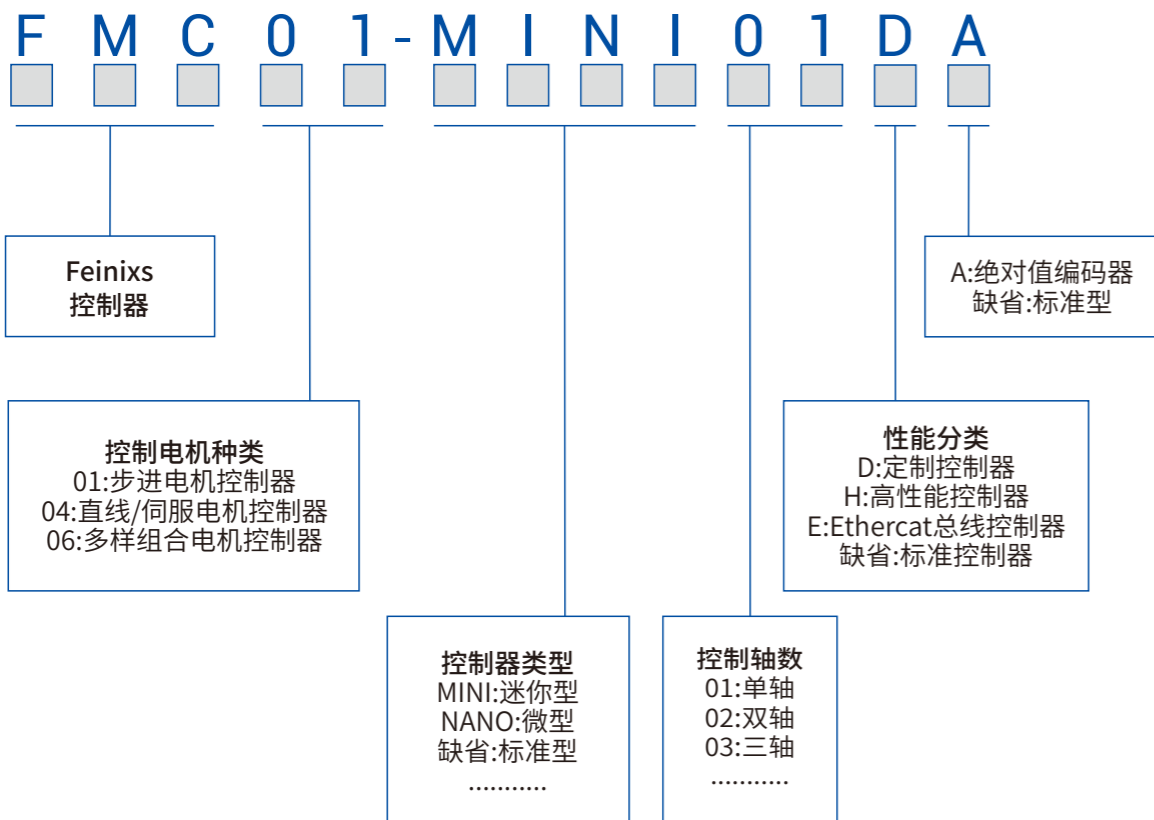

Feinixs specializes in precision motion control, offering high-performance controllers meticulously designed for our own line of stepper, servo and linear, positioning products. From simple point-to-point movements to complex multi-axis coordinated motion along any trajectory, as well as interactive program control with other instruments, our controllers excel in a wide range of applications. Moreover, we provide in-depth customization services, encompassing both hardware and software, to meet your specific control requirements.
